

JAM Pack Emerald

The JAM Pack Emerald package combines the evocative power of fog and a UV wash/strobe in one turnkey pack that also offers IRC-6 remote control. The pack's Hurricane 700 fog machine emits thick bursts of water-based fog, which perfectly highlights the combined output of a UV Wash and white strobe. An included IRC-6 remote can be used to control the UV strobe remotely, triggering auto and sound activation modes. Completing this handy party pack are one external power supply and mounting hardware.
